SUMMARY OF EXPERIENCE

- ✓ 3+ years of programming experience (software and web development)
- ✓ 3+ years of experience as a data analyst
- ✓ 2+ years of experience in customer technical support

TECHNICAL SKILLS

- ✓ **Programming and Web Development Tools:** JavaScript, Python, PHP, HTML5, CSS3, Bootstrap, Node.js, React, AngularJS, Typescript, Java, C#, ASP.NET, Android Studio, VBA for Excel
- ✓ **Database:** SQL, NoSQL, Postman
- ✓ **Architecture:** Object Oriented Programming, MVC framework, RESTful API
- ✓ **Data Analysis and Machine Learning:** Python, Numpy, Pandas, Scikit-Learn, Keras, Tableau, Excel, Access
- ✓ **General:** Git Version Control and MS Office Suite

RELEVANT PROJECTS

- Capstone Project: Gym Information and Tracking System (MEAN stack)
 - Developed a full-stack (front-end UI, back-end server, database) web application that manages data and information within a business entity (CRUD functionalities)
 - Implemented various technologies via Node Package Manager (such as QR code scanner, JWT web tokens, nodemailer etc) which improved the overall application by making business processes run smoother
 - Mainly worked on developing back-end APIs using NodeJS to access MongoDB collections
- Coronavirus Digital Agent (Python, Keras, Flask, Pandas, Numpy)
 - A digital agent that answers questions about the Coronavirus
 - Trained by a Densely Connected Neural Network
 - Use BeautifulSoup to update the site with current global data
- GPS Route Tracker (Java, Android Studio, SQLite)
 - Developed an android application that tracks a route taken using GPS and draws it to a google map API
- College Application Regression and Classification (Python, scikit-learn, Pandas, Keras)
 - Used various supervised learning models such as Linear Regression, Logistic Regression, KNN, SVM and Decision Tree Classifiers to predict outcomes
 - Pandas and MS Excel used for data preparation
 - Matplotlib used for data visualization
- Casino game (JavaScript, HTML, CSS)
 - Used mathematical probabilities and basic casino game mechanics
- Memory Sequence game (JavaScript, HTML, CSS)
 - Game to improve individual short-term memory

EDUCATION

Computer Programmer Analyst (Advanced Diploma)

2018 – Expected 2020

George Brown College, Toronto, ON

Dean's List (Cumulative GPA: **3.98**)

Bachelor of Science in Management Engineering (Honours Program)

2008 - 2012

Ateneo de Manila University, Manila, Philippines (*WES accredited, Top Philippine University*)

Financial Aid Scholar

Dean's List

WORK EXPERIENCE

Marketing Database Support

2019 – Expected April 2020

George Brown College, Toronto

- Prepared/Cleaned marketing data and liaised with the team to carry out suitable analysis
- Designed and automated dashboards with data visualizations to deliver key department insights using MS Access and Tableau which reduced manual work by 75%
- Created SQL scripts to extract and manipulate data from database to meet client's requests
- Used machine learning models (Python, Pandas, SkLearn) to discover and predict which marketing events led to more applications

Project Analyst/Tier-1 Technical Support

2015-2017

[24]7.ai, Toronto

- Prepared daily client reports which included analysis of trends and performance data
- Designed and developed workflow macros (using Visual Basic for Excel) which increased overall team efficiency by at least 50%, measured by work hours logged per project per employee (This saved the company a lot of time and money)
- Created numerous internal and external client reporting templates which replaced the older and outdated versions
- Handled level 1 client issues over the phone; created escalation tickets for level 2 client tech support
- Recipient of quarterly Bravo Award for showing great performance and leadership in developing and implementing process improvement methods
- Provided MS Excel training workshops to peers

Production Operator/Production Specialist

2013-2015

Woodbridge Foam Corporation, Woodbridge, Vaughan

- Sorted complex data, created data spreadsheets, prepared reports, and organized files and records
- Improved the production line scheduling process by designing an application in MS Excel which improved efficiency of production line by more than 10% (measured in reduction of product line cancellations)
- Created spreadsheet to monitor Work in Process Inventory products running on schedule

Floor/Backroom Associate

January – June 2013

Target Canada, Brampton Shopper's World

- Worked with Target's in-house software systems, updating merchandise inventory, etc.
- Analyzed and organized the backroom to be able to efficiently work with the whole system of pulling and pushing merchandise on the sales floor
- Recipient of "Team Member of the Month" award

VOLUNTEER EXPERIENCE

UofT Hacks 2019 Volunteer, University of Toronto, Toronto

January 2019

- Coordinated with representatives from Microsoft, Google, etc. to help set up sponsor booths
- Manned booths and supported the hackers on their hackathon quest
